# Borders

Use border utilities to quickly style the border and border-radius of an element. Great for images, buttons, or any other element.

## Border

Use border utilities to add or remove an element's borders. Choose from all borders or one at a time.

## Additive

[Copy](#)

```
<span class="border"></span>
<span class="border-top"></span>
<span class="border-right"></span>
<span class="border-bottom"></span>
<span class="border-left"></span>
```

## Subtractive

[Copy](#)

```
<span class="border-0"></span>
<span class="border-top-0"></span>
<span class="border-right-0"></span>
<span class="border-bottom-0"></span>
<span class="border-left-0"></span>
```

## Border color

Change the border color using utilities built on our theme colors.

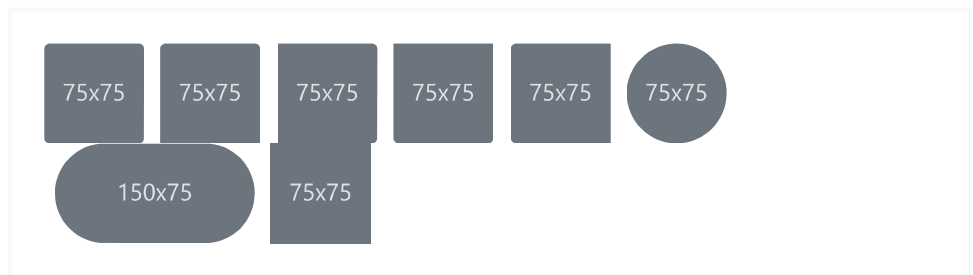

Copy

```
<span class="border border-primary"></span>
<span class="border border-secondary"></span>
<span class="border border-success"></span>
<span class="border border-danger"></span>
<span class="border border-warning"></span>
<span class="border border-info"></span>
<span class="border border-light"></span>
<span class="border border-dark"></span>
<span class="border border-white"></span>
```

## Border-radius

Add classes to an element to easily round its corners.

Copy

```

```

## Sizes

Use `.rounded-lg` or `.rounded-sm` for larger or smaller border-radius.

Copy

```

```
